Kobe Michael

Web Developer and Designer

CAREER OBJECTIVE

With five years of hands-on experience in frontend development using Vue.js, React.js, JavaScript, and TypeScript, I'm passionate about creating elegant and user-friendly interfaces. I'm proficient with Tailwind CSS and SASS/SCSS and also utilize design tools like Figma and Adobe XD. I'm now seeking a role that lets me apply my expertise to innovate and contribute to cutting-edge frontend projects and or web appplications.

EXPERIENCE (1 / 2)

Frontend Developer

Cloud Employee LTD

Nov 2021 - Present - 2 year, Remote

Engaged in direct collaboration with CloudEmployee's Chief Technology Officer and collaborated with Backend Developers from Storma to conceive and implement an internal system for Cloud Employee. This strategic initiative led to the project's early completion by a margin of four days.

Senior Frontend Developer

SupaPass

Nov 2021 - July 2023 - 1 year 9 mos, Remote

Efficiently collaborated with the SupaPass Team to optimize product development discussions, resulting in a noteworthy reduction of X days in feature rollout turnaround time. Additionally, offered valuable consulting and insights for enhancing the user interface of the web application, resulting in an improved and user-friendly experience.

Frontend Engineer - BIZMAKE Project

CODY Web Development Inc.

Jan 2021 - Oct 2021 - 10 mos, Philippines / Remote

Collaborated closely with the Bizmake team to implement a canvas/ whiteboard feature for their web application. Systematically optimized their codebase to enhance performance, achieving notable metrics for improved efficiency. This involved rigorous collaboration with their Japanese backend developers and team lead.

Lead Frontend Engineer - Arise Project

CODY Web Development Inc.

Sep 2020 - Dec 2020 - 4 mos, Philippines / Remote

Directed frontend development for an employee monitoring system using React.js and Chart.js, commissioned by Arise company. The project encompassed functionalities such as presenting location data, monitoring work hours, recording incidents, and more. Successfully delivered the project two weeks ahead of the deadline.

Frontend Web Developer

BPOSeats.com

Apr 2019 - Aug 2020 - 1 year 5 mos, Philippines

Engaged in direct collaboration with the CEO, project managers, and design team to optimize the UI/UX experience through a streamlined design process encompassing research, design, testing, and iterative refinement.

Design Team Manager

BPOSeats.com

Apr 2019 - Jan 2020 - 10 mos, Philippines

Collaborated with the CEO and project manager to assess essential and upcoming features requiring design and mock-ups. Conducted rigorous design evaluations and code reviews, assigning specific design tasks to team members. This streamlined approach led to a measurable improvement in overall project efficiency.
